

Institutional Partnership Prospectus

Exploratory education and professional-development collaborations | October 2026

THE OPPORTUNITY

Power Pulse WB-EMS Coach Academy invites fitness education providers, professional associations, studios, health and wellness organizations and suitable institutional partners to explore specialist Whole-Body Electromyostimulation (WB-EMS) education. Each partnership is shaped by organizational needs, professional scope and a separately agreed framework.

LEVEL 1 EDUCATION PATHWAY

Level 1 is a self-paced online WB-EMS professional education and coach-training program delivered through LearnWorlds. It comprises 11 instructional modules and a 12th scientific evidence and reference module. The advertised learning time is 40 hours, subject to final LMS-based time reconciliation for formal external review.

Subjects include WB-EMS and localized NMES distinctions, neuromuscular physiology, electrical parameters, screening and contraindications, informed consent, safety, scope of practice, equipment and software workflow, programming, progression, monitoring, troubleshooting, documentation and evidence-informed professional judgment.

Assessment includes applied activities and graded module examinations. The working master record lists 437 graded module questions, subject to reconciliation against the live LMS. The 80-question final examination requires an 80% passing score; three attempts are included.

POSSIBLE INSTITUTIONAL MODELS

Institutional or group enrollment. Provide an agreed access pathway for appropriate staff, students or members.

Course distribution and referrals. Explore mutually agreed marketing, referrals or distribution with defined operational responsibilities.

Curriculum integration. Consider academic mapping or inclusion in existing professional-development programs, subject to review and written agreement.

Recognition or continuing education review. Independent organizations may review the program against their own criteria; no approval or credits are implied.

Regional practical workshop hosting. Explore a separate 22.5-hour supervised workshop, subject to demand, suitable facilities, staffing, equipment, safety and travel arrangements.

Future regional instructor development. A possible later pathway requiring competency evaluation, safeguards and written authorization.

PRACTICAL EDUCATION AND PROFESSIONAL BOUNDARIES

The 22.5-hour Practical Application Workshop is separate from Level 1 and is not required for Level 1 completion. Online theory completion does not independently establish practical competence, clinical authorization or third-party CEU/CEC recognition. Participants must work within their applicable professional and jurisdictional scope.

ACADEMIC OWNERSHIP AND COMMERCIAL TERMS

Power Pulse retains control of its curriculum, teaching materials, examination bank, learning platform, branding and credentialing standards. No partnership, accreditation, geographic exclusivity, teaching rights, sublicense, equipment supply or commercial arrangement is created by this document. Pricing, marketing responsibilities, learner support, regulatory compliance and any regional delivery terms require separate written agreement.

REVIEW RESOURCES

Institutional Partnerships: <https://www.emspowerpulse.com/institutional-partnerships>

The internal Professional Program Review Dossier, full examination bank and detailed teaching materials are not included in this introductory prospectus. Appropriate academic reviewer access can be considered separately.

NEXT STEPS

Share your organization, region, professional audience and preferred collaboration model. An exploratory conversation can identify a suitable pilot, academic review process or institutional enrollment approach without assuming any agreement.
